OBJECTIVE

To secure a position as a Backend Developer or IT Specialist where I can leverage my experience in automation, large-scale data migration, and technical infrastructure. I aim to apply my skills in AI and Python to drive efficiency and solve complex technical challenges.

EDUCATION

- 2019 - 2025 COLLEGE
- CEBU INSTITUTE OF TECHNOLOGY UNIVERSITY
- Natalio B. Bacalso Ave, Cebu City,

SKILLS

Hard Skills (Technical)

- Programming & Automation: Java, Python, React.js, HTML/CSS, Web Scraping (Automation).
- Infrastructure: DNS/SSL Management, Web Hosting Architecture, Email Protocols (IMAP/POP3).
- AI & Data: Prompt Engineering (Advanced), Data Processing, Computer Vision (OpenCV).
- Design & Tools: WordPress/CMS Troubleshooting, Photoshop, Illustrator, MS Office Suite.

Soft Skills (Professional)

- Problem Solving: Advanced technical troubleshooting for server-side and automation bottlenecks.
- Project Management: Managing high-volume quotas (3 migrations/day) and tight deadlines.
- Communication: Technical documentation and client-facing technical support.

LANGUAGES

- English: Fluent
- Filipino: Fluent
- Cebuano: Fluent

WORK EXPERIENCES

- IONOS Philippines Inc.

Representative Website Administration (Website Migration)

Sep. 2025 - Feb. 2026

 - Project Execution: Successfully completed the migration of 4,000+ websites from legacy platforms to IONOS infrastructure within a strict 3.5-month timeline.
 - High-Volume Output: Consistently met a quota of 3 full-site migrations per day while navigating tool limitations and server-side delays.
 - Technical Quality Assurance: Verified post-migration functionality, ensuring zero data loss and seamless DNS transitions for live websites.
- Lifewood Data Technology Philippines

IT Intern

Jan. 2025 - Apr. 2025

 - Automation & Scraping: Developed Web Scraping scripts to automate data collection, significantly reducing manual effort.
 - AI & Prompt Engineering: Utilized AI tools and advanced Prompt Engineering to streamline data processing and genealogy-related workflows.
 - Web Development & Design: Contributed to genealogy-focused web development projects, assisting in both design and backend data entry.
 - Data Processing: Managed large datasets for genealogy records, ensuring accuracy and efficient retrieval.

PROJECTS

- CITSecure (Capstone)

Backend Developer of CITSecure

Jan. 2024 - Dec. 2024

 - Halfway to the completion of Capstone. CITU-Secure is a solution that enhances security and streamlines visitor management within the CIT-U campus. The system allows for efficient tracking of visitors, including their personal information, purpose of visit, and entry/exit times.
 - My role was doing Backend Development, like visitor management and tracking.
- Real-Time Face Recognition using OpenCV

Backend Development and Collecting Data

2023-2024

 - The project is all about, how we aimed to develop a real-time face recognition system using computer vision technology. We utilized OpenCV, and Python, to create a robust solution capable of identifying faces in live videos, or in real-time.
 - My role was doing Backend Development and Collecting Data to train the image recognition model much more better
