OBJECTIVE

Backend Developer and IT Specialist with a track record of migrating 4,000+ live websites and building automation in Python and Java. Now training as a Tier 1 SOC analyst (Splunk, Wireshark, Nmap, MITRE ATT&CK) and seeking a Backend Developer, IT Specialist, SOC Analyst or IT Security role.

SKILLS

- **Backend and automation:** Java, Python, JavaScript, React.js, HTML/CSS, Spring Boot, Hibernate, JUnit, Maven, Docker, web scraping, n8n workflows
- **Security (SOC):** Splunk detections, dashboards and alerts; Wireshark traffic analysis; Nmap scanning on Kali Linux; incident write-ups mapped to MITRE ATT&CK
- **Infrastructure and hosting:** DNS/SSL management, web hosting architecture, IMAP/POP3 email, WordPress/CMS troubleshooting, IONOS, Vercel
- **AI and data:** Prompt engineering (advanced), data processing, computer vision with OpenCV
- **Tools and design:** Git/GitHub, Photoshop, Illustrator, MS Office
- **Professional:** Server-side and automation troubleshooting, high-volume deadline management, technical documentation and client-facing support

WORK EXPERIENCE

Representative, Website Administration (Website Migration) · IONOS Philippines Inc. · Sep 2025 – Feb 2026

- Migrated 4,000+ websites from legacy platforms to IONOS infrastructure within a strict 3.5-month timeline.
- Met a quota of 3 full-site migrations per day while working around tool limitations and server-side delays.
- Verified every site after migration, with zero data loss and no live sites taken offline by DNS changes.

IT Intern · Lifewood Data Technology Philippines · Jan 2025 – Apr 2025

- Wrote web scraping scripts that automated data collection and reduced manual work.
- Used AI tools and prompt engineering to speed up data processing and genealogy workflows.
- Worked on design and backend data entry for genealogy-focused web projects.
- Managed large genealogy datasets, keeping records accurate and easy to search.

PROJECTS

Roxy, Discord Stats Bot · Python, discord.py, SQLite · Jun 2025 – Present

- Built a Discord bot that automatically turns chat, voice, gaming, app and Spotify activity into XP, levels, profiles and leaderboards.
- Live in 23 servers with 1,600+ members and 21,000+ recorded sessions.
- Implemented an anti-spam XP system, role-based permissions and crash recovery.

SOC Analyst Training Labs · Splunk, Wireshark, Nmap, Kali Linux · Sep 7 – Sep 29, 2026

- Analyzed network traffic in Wireshark, scanned lab machines with Nmap, and built detections, dashboards and alerts in Splunk.
- Triaged alerts and wrote incident reports mapped to MITRE ATT&CK, with a clear escalation path to the next tier.

CITSecure (Capstone), Backend Developer · Jan 2024 – Dec 2024

- Built the backend of a visitor management system for the CIT-U campus that tracks visitors' personal information, purpose of visit and entry/exit times.

Real-Time Face Recognition using OpenCV, Backend Developer and Data Collection · 2023 – 2024

- Helped develop a real-time face recognition system in Python and OpenCV that identifies faces in live video.
- Collected and prepared image data to improve the recognition model.

CERTIFICATIONS

- **Cybersecurity Threat Monitoring I**, GFG TESDA Training Center · Sep 7 – Sep 29, 2026
- **Fortinet NSE 2 Certified in Cybersecurity**, Fortinet Training Institute · Sep 2026 (valid to Sep 2028)
- **Fortinet NSE 1 Certified in Cybersecurity**, Fortinet Training Institute · Sep 2026 (valid to Sep 2028)
- **Network Defense**, Cisco Networking Academy · Sep 2026
- **Back End Development (Java)**, Accenture Technology Academy · Sep – Dec 2023, 138 hrs
- Full list of 13 certificates on Credly and the portfolio
